Established in 1973, Modwood specialise in making cabinets for the dental industry. Our Cabinets are custom made and hand finished to your own surgery requirement and fitting is carried out by our own team of expert technicians. When you order Modwood Cabinets you can be sure you are buying the very best in Design, Technology and Style.
The Sedona Range of cabinetry has been designed for the Dental Practice that requires both style and quality. The units are manufactured in a maximum of four units to each free-standing run. The doors and drawer fronts are produced in 18mm Apollo Solid Acrylic with our touch out facility thus avoiding the necessity of handles which is hygienic and for easier cleaning. The Corian Solid Surface Worktops feature a 65mm front frame band and incorporates solid surface ends and base trims which are most pleasing to the eye. This range is the ultimate in design for the clients who will not compromise in looks and quality.
The Sereno Range has been designed for those clients who demand high quality and hygiene with no compromise.

The doors, drawer fronts, and all outer facings of the range are manufactured in 18mm Solid Acrylic Parapan. This is a market leading material, stronger and more robust than conventional laminates and guaranteed not to discolor or react to ultraviolet rays.

The drawers are made with epoxy coated metal sides and solid laminated bottoms and bases. All drawers are soft close. The carcasses and fronts are made from laminated MDF. The doors are all fitted on 170˚ fully adjustable clip-on hinges.

As an option, you can upgrade your surgery to include Corian or Wilsonart solid surface worktops and bowls. Additional options can include wall cupboards and mobile units to match.
The Monterey range of cabinetry is designed for clients who require the benefit of Solid Acrylic Fronts at competitive prices. The doors and drawer fronts are produced from 18mm Solid Acrylic Apollo. There are approximately 20 colours to choose from to be coordinated to any Surgery design. The fronts are in a gloss finish with radiused edges all around being impervious to any ingress of water which eliminates the risk of any contamination. All carcasses are manufactured in 18mm melamine MDF with soft close drawers including a variety of inserts. Doors are fitted with 170 degree fully adjustable clip on hinges. The postformed laminated worktops come as standard.

To complement the range we would recommend upgrading the worktops to our Vista Range of Corian with top mounted stainless steel bowls which are competitively priced or our top of the range Corian with Corian undermounted bowls. Special non standard units can be manufactured to match this range, including Wall Cupboards and Mobiles.
The Ventana Range of dental units give superb value for money, with each surgery being tailor made to suit any size or shape of room. The units come as standard with posformed laminated work tops and integral upstands for ease of cleaning and maintaining a hygienic surface.

The carcasses and fronts are made from laminated MDF. All drawers are fitted with soft close action and are available in various widths with plastic instrumentation inserts. The doors are all fitted on 170˚ clip-on hinges.

Sink units are available with flaps or hands free kick pads. All plinths are laminated WBP Ply to alleviate any moisture problems on the flooring surface. A full range of laminate colours are available along with a choice of handle designs.

As an option, you can upgrade your surgery to include Corian or Wilsonart solid surface worktops and bowls. Additional options can include wall cupboards and mobile units to match.
CARMEL RANGE

The Carmel Range of cabinetry is designed for the discerning client who requires both style and durability. The doors, drawer fronts and outer panels are manufactured in grey Corian Solid Surface with radius edges all around. Corian is virtually indestructible as any scratches or chips can be infilled and repolished. With over 100 colours to choose from there would be no problem to complement any surgery decor. Our standard carcases are manufactured in silver melamine MDF with high quality soft close drawers, incorporating a variety of drawer inserts.

The doors are fitted with 170 degree fully adjustable clip on hinges. The postformed laminate worktops with integral swept upstands are included in our prices although we would recommend upgrading the tops to our competitive Vista Range which is manufactured in Corian with top mounted stainless steel bowls or our top of the range Corian with Corian undermounted bowls. Additional non standard units including Wall Cupboards and Mobiles are available for special order to complement the range.
The Nevada Range of cabinetry has been designed to be very competitive at the budget end of the market.

The quality of this range has been kept to a high standard.

The doors and drawer fronts are manufactured in plastic laminate with postformed vertical edges, and all horizontal edges in matching colour melamine.

There are 12 colours to choose from:

- All carcases are manufactured in 18mm MDF with White PVC wrapped drawers on standard conventional drawer slides incorporating various types of drawer inserts.
- The doors are fitted with our 170 degree clip on hinges as are supplied on our more expensive ranges. The postformed laminated worktops with the integral swept upstands are supplied as standard although it is possible to upgrade to our Vista solid surface Corian Worksurfaces with top mounted stainless steel bowls or at an additional cost with bespoke Corian tops incorporating Corian undermounted bowls. Optional Units can be manufactured to include Wall Cupboards and Mobiles.
CABINET OPTIONS & SIZES

Service Diagram Notes:
• In-Hot 15mm Copper Terminate Ballvalve.
• C-Cold 15mm Copper Terminate Ballvalve.

NOTE: Pipes should travel along wall as close as possible, keeping below 350mm when turning through 90 degrees and rise to a height of 650mm, terminate Ballvalve.
• Double non-return valves must be fitted to both Hot and Cold UNLESS both are tank fed.
• W-Waste 40mm Solvent Weld plastic.
• Service gap is maximum 150mm.
• Sockets, run at the appropriate height for the upstand, connected by a Qualified Electrician to ring main.
• Electrician and Plumber to revisit after Cabinets are fitted to do second fixings.
• Surgery should be isolated to allow plumbing and electrical work to be carried out without disturbing other surgeries.
• Shut off valves and isolation switches should be easily accessible throughout installation.
• ALL SERVICES MUST BE IN PLACE PRIOR TO INSTALLATION OF CABINETS.

We reserve the right to change the drawer configuration at any time due to the drawer Specification.
